Kunderådgivere. ☑ Til butikken Hele Norges nettbutikk for bedrifter PLOD

Gratis frakt 14 990,

For this example, the country is Norway

Within the link of each product, the different offers available show up. We generate a column "Avg price" that calculates the average up on these prices for the product.

Here, we would have (14490 + 14990 + 14990+14990+14990)/5 = 14890 = Avg price

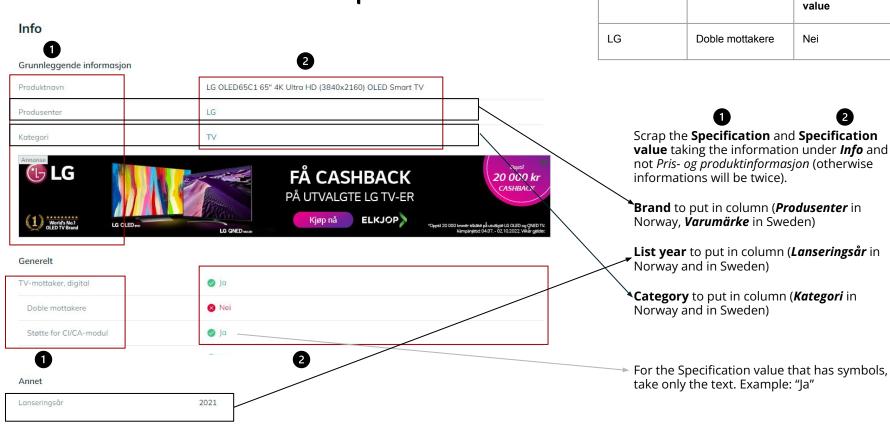

We also aggregate the number of offers. Here, Number of offers is 5

#### Output

Country Code	name	Avg price	Nb of offers
NO	LG OLED65C1	14890	5

Nb of offers to be calculated

### 2. Elements to scrap (2)

**Output** 

**Brand** 

**Specification** 

Specification

#### 3. Final output

calculated

Country code	Brand	category	name	offers	List Year	Avg price	currency	Specification	Specification value
NO	LG	TV	LG OLED65C1 	5	2021	14890	NOK	Doble mottakere	Nei

• • •

Note: For *Currency*, we put the value "NOK" for Norway and "SEK" for Sweden

# Adjustment: take all characteristics from "Info" and not the ones from "Produktinformation"
